

THE TRAINING

The European training¹ (*Activity 2.1 Training for Multipliers*) is a preparatory activity for the development of the 46 local trainings for multipliers directed to NGOs, Social and Solidarity Economy operators. The European training is essential for the acquisition of competences and educational methodologies related to the project topics.

The **objectives** of the training will be:

1. to create a common language on the SSE;
2. to share and analyse the researches results;
3. to deepen the knowledge on some SSE sectors (agriculture, services, energy), data and public policies/legislations;
4. to strengthen the link between development cooperation and SSE;
5. to analyse and build in each territory the relations with the stakeholders;
6. to share inputs on local trainings for the preparation of the guidelines;
7. to improve skills and methodologies on participation.

¹ The European residential training will be accessible by each partner through an audio conference system, except for the working group parts.

In collaboration with:
